

## Explore Learning

*"Meetupcall provided us with exactly what we were looking for..."*

Matthew Evans, Explore Learning

### What issues was the client trying to solve?

The move to Meetupcall really stemmed from our requirements as a business to be able to properly control our audio conferencing. We had been using Meeting Zone for a number of years and the costs and services seemed to be out of control and inconsistent with what we were looking to achieve.

### Why was Meetupcall a good solution?

Meetupcall provided us with exactly what we were looking for, a customised plan that was fit for purpose, intuitive to use, easy to manage and most importantly high quality voice. Our previous provider suffered from higher costs, lower quality of voice and user experience. This has been fully addressed with the new service from Meetupcall.

### How was the move to Meetupcall?

It was simple and quick the team at Meetupcall on-boarded our staff over a couple of remote demo sessions and since then we have internally been bringing everyone else onto the tool. It has been so straightforward, we haven't had any negative responses from our staff all has been great and they are now all fully using the services daily.

### The results!

Drastic from our improvements in internal communications, cost, quality and function, this enabled us to easily be able to forward plan the service around our growth and continues to help our communication with all departments.
